DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 4, 7-9, 12 and 15-17, drawn to a method of treating and protecting the skin of a human patient having skin with high exogenous surfactant concentration, classified in class 424, subclass 401.
 - II. Claims 2, 3, 5, 6, 10, 11, 13 and 14, drawn to a method of protecting the skin of a human patient from exogenous high surfactant concentration, classified in class 514, subclass 526.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are difference methods of using compositions comprising same compounds (ectoins). The claimed methods are not disclosed as capable of use together as they are intended for different patient populations, i.e. the method of Group I is used for treating patients having skin **with** high surfactant concentration, while the method of Group II is used for protecting the skin of patients **from** high surfactant concentration.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

Art Unit: 1616

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
